

Denning Storage Bench

Short Description: Minimalistic & modern

SKU: DE-1006

\$1,299.98

The Denning Bench is defined by its material: fiber-reinforced concrete that incorporates granite stone powder, natural jute fibers, and Portland cement. The multi-use bench has been sealed to create a smooth surface and features a handle at each end. Over time the in door-outdoor piece will develop a unique patina and personality, reflecting the surprising evolutionary nature of its industrial material.
